

Difficult Airway Society

Process of submitting a case to the DAS Database

Consent

Download the patient information and consent form from the DAS website https://das.uk.com/aac/consent_form

Please make sure that the patient has fully recovered from the effects of anaesthesia before having a discussion and then obtaining consent. The Recovery Room is not a recommended area for obtaining consent.

Give one copy of the consent form to the patient and keep one in the hospital records

Data submission

If you are not a DAS member, you need to register with the database before submitting data. Registration is free and only takes a few minutes.

Please follow this link https://das.uk.com/das_user/acaregister

If you are a trainee or a supervised specialty doctor, please discuss with your supervising consultant before submitting the data and provide their name on the form

Summary

Once the data is submitted, there will be an option to print out the summary of the event. Please print two copies, give one to the patient and keep the other in the patient records.

GP letter

There will also be an option to print out a letter to the GP. This can either be sent directly to the GP or give it to the patient with instructions to hand it over to their GP.
